

Designed for 12V vehicles, the STARTRONIC 600 is a smart battery-less booster pack. Equipped with supercapacitors, the device uses the vehicle battery's residual voltage to charge itself and start the engine in a few seconds. Recharging on the mains is not necessary.

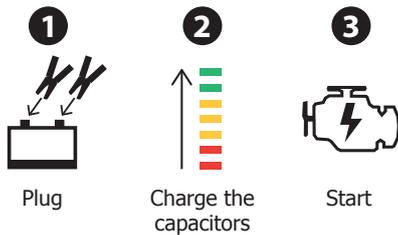

STARTUP ASSIST

With its 550A starting power, it can start light vehicles (*gas & diesel*) equipped with a 12V battery **in less than 2 minutes**.

2 «forced» modes for maximum effectiveness :

- «**Bypass**» mode to start a vehicle with a deeply discharged battery.
- «**Glow**» mode (pre-heating) to start diesel vehicles in cold temperatures.

EASE-OF-USE

SAFETY START

Safe electronic system :

- Anti short-circuit protection.
- Anti polarity reversal technology.
- Anti deep discharge protection.

MAINTENANCE FREE

- **Battery-less technology.**
- **Always operational**, even after years in storage.
- Resistant to extreme temperatures (-40°C / +65°C).
- **Long life cycle**, it can be used 10 000 times without diminishing performance.

ADAPTED CONNECTORS

The STARTRONIC can be pre-charged in 3 different ways :

- On a 12V substitute battery (liquid, gel, AGM, Start & Stop) in less than 2 minutes.
- on a cigarette lighter plug (12V / 10A) in 2 minutes.
- via the micro USB cable (5V / 2A) in 20 minutes (cable not supplied).

COMPACT

Compact (1420g), it is easy to carry around and will easily fit in a car's boot.

Supplied with :

Carrying bag

Cigarette lighter socket
