

To: ALL DEALERS & DISTRIBUTORS

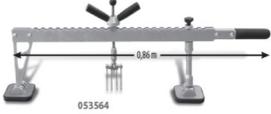

CATEGORY: General	REF: General/Service/2017/4006	DT: 13/06/2017
	APPLICABILITY: All Models	WHEEL BASE: All
SUBJECT: Cabin & Body repair equipment		

We are pleased to offer our recommendation for the following workshop equipment for carrying out the cabin & body repairs at **EICHER** dealer workshops.

➤ **Introduction details:-**

S. N.	Equipment	Illustration	Purpose	Benefits
1	Inverter Spot Welding Machine (Model-BPLX)		To spot weld the metal parts.	<ol style="list-style-type: none"> 1) Better weld finish. 2) Single and double sides spot weld is possible. 3) Inverter technology for max stability in current producing better stronger consistent welds. 4) Water cooled arms, electrodes and cables for maximum performance. 5) Easy operation in Auto, manual & standard modes. 6) Comes standard with variety of arms for different body area repair.
2	Steel Dent Puller (Model-GYSSPOT 39.02)		<ol style="list-style-type: none"> 1) Dent pulling and straightening of cabin body 2) Carbon Shrinking 	<ol style="list-style-type: none"> 1) Welding of stars and washers for panel pulling. 2) Wavy wire welding, ideal for a curved profile. 3) Contact shrinking, to work on light impacts and for the highest quality finish 4) The welding is triggered automatically by a simple contact

VE Commercial Vehicles reserves the right to make changes in their vehicles, aggregates and parts as a part of their continuous improvement program without any prior intimation or obligation to incorporate the same on vehicles already produced.

				between the tool and the part to straighten.
3	Double Action Leveling Bar		Ideal for long dents.	<ol style="list-style-type: none"> 1) Dent can be corrected on vehicle. 2) Dent pulling is even throughout the length of damage.
4	Plasma Cutter (Model-31 FV)		To cut the metal parts.	<ol style="list-style-type: none"> 1) The plasma 31FV allows high quality cutting even on painting. 2) Cutting process eliminates large heat distortion due to which the chemical properties of the sheet metal are not disturbed. 3) Up to 8mm steel, stainless steel and cast iron sheets. 4) Up to 5mm aluminium and copper sheets. 5) High speed precision cutting.
5	Pneumatic Spot Weld Cutter		Cutting the spot welding joints	<ol style="list-style-type: none"> 1) Useful for cutting the spot welding joint on the first panel without damaging the second panel. 2) Easy in operation.
6	Pneumatic Sander with different sander		Paint removal in small areas.	<ol style="list-style-type: none"> 1) Compact and lightweight for easy access in tight areas. 2) Rubber molded palm grip for added comfort. 3) Adjustable speed regulator to match the speed to the job.
